

BEST 9K Series Installation Guide

9K Series Overview

The BEST 9K cylindrical lock series offers modern security and versatile function options. These locks are UL listed and suitable for commercial and institutional applications.

Installation Steps

1. Prepare door with correct bore holes (typically 1.25" and 2.125" depending on model). 2. Insert inside and outside trim with proper orientation. 3. Align cylinder housing and secure with provided screws. 4. Install strike plate aligned with latch projection.

Function	Description	Typical Use
01	Passage	Interior corridor doors
02	Privacy	Office and restroom
03	Storeroom	Closets, storage areas
04	Classroom	Classroom with exit-only

Field Service

The 9K series is easily serviceable in the field. Cylinder removal and replacement can be accomplished without disassembling the lock body, enabling rapid core changes and master key updates.
