

## IEI Indoor vs Outdoor Keypads

### 212SE (Standard)

The 212SE is a basic keypad for controlled interior environments. Standard rating is suitable for offices and corridors.

### 212i (Indoor Enhanced)

The 212i is an enhanced indoor model with better display visibility and extended feature set. Suitable for institutional and commercial facilities.

### 212w (Weatherproof)

The 212w is rated for outdoor exposure. Sealed against moisture and temperature extremes. Suitable for exterior doors and weather-exposed locations.

### 232i (Advanced Indoor)

The 232i is an advanced indoor model with expanded programming and integration capabilities. Suitable for larger institutional facilities with complex access requirements.

Model	IP Rating	Temperature Range	Application	Security Level
212SE	IP54	0-50C	Interior Standard	Basic
212i	IP54	0-50C	Interior Enhanced	Standard
212w	IP67	-20-60C	Exterior	Standard
232i	IP54	0-50C	Interior Advanced	Enhanced
