

Keedex Gate Box Selection Guide

Gate Box Purpose

Keedex gate boxes are secure lock storage containers for holding master keys, override keys, and backup cylinders. Gate boxes enable rapid access during emergencies while maintaining key security.

K-BXSIM (Simplex Model)

The K-BXSIM is a push-button gate box holding Simplex locks. Designed for facilities with push-button access requirements.

K-BXMOR (Mortise Model)

The K-BXMOR accommodates standard mortise cylinders and locks.

K-BXRHO (Rim Model)

The K-BXRHO is designed for rim cylinder compatibility.

Model	Lock Type	Capacity	Material	Application
K-BXSIM	Simplex	Multiple	Steel	Push-Button Systems
K-BXMOR	Mortise	Multiple	Steel	Standard Cylinders
K-BXRHO	Rim	Multiple	Steel	Rim Cylinders

Lock Compatibility

Verify your existing lock type before selecting a gate box model. Select the model matching your facility's primary lock hardware.
